### DETAILED ACTION

1. Applicant's arguments with respect to claims 1-10,19-31 have been considered but are moot in view of the new ground(s) of rejection.

#### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

3. Claims 1-6,8-10,19-31 are rejected under 35 U.S.C. 102(e) as being anticipated by Acker et al.

Acker et al. disclose an engine powered generator comprising: an engine (10) has an output shaft (12) rotating about an axis; a plate/wall (16) mounted to the engine; a generator (29) mounted to the plate, including a rotor (36), a stator (40) to a circular cross section housing (fig. 1), the stator is permanently secured in the housing; and at least three or six of cylindrical pins (22) disposed on the plate, each of the pins tangentially contacts an inner and outer housing surface, to concentrically align the stator and the rotor (col. 3, ln. 32-40).

Regarding claims 19-25, the method therein is inherent given the apparatus of acker et al.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over acker et al.

Frank discloses the claimed invention except for the shape of the pin is a dowel shape. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the pins as taught by Frank in a dowel shape since it was known in the art that modifying the shape of the pins would function equally well with the claimed invention.

***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 2834

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
